

You need to expedite and ENFORCE the transition to digital television. NO WAIVERS should be allowed. There are stations, such as WGCL, WABE and WPBA in the Atlanta market that do not take digital television seriously. WGCL's station has documented failures and lip sync issues ongoing for over 2 years that still is yet to be resolved. Is there no requirement for properly maintaining a digital station once it's on the air?? WABE and WPBA both have no digital transmit facilities at all, they either need to go live soon, or lose their licenses.

Sincerely,
Bob Merritt
